# Show Previews

## A show preview can offer many benefits for your company.

It can help create awareness and generate interest by providing details of what attendees can expect from your stand. A show preview is a valuable marketing tool that can highlight your key products and services, thus encouraging pre-event engagement. By showcasing your company's expertise, a show preview can enhance your brand's image and increase the chances of attracting media coverage, leading to broader exposure.

## How to write your show preview

- Your show preview should be around 350 words long
- Include a picture that illustrates your story (300 DPI for print, at least 72 DPI for online)
- Write about the most important thing you will be communicating to your customers at the show
- It should be about how you can help them in their future

## What to include

Remember, you are not writing a story, you are writing news – so the most important information goes at the top!

- Include the who, what, why, when and where in your first sentence. For example:  
*"After being blown away by the response to its new solutions for the electrical engineering industry, ACME LTD will be showcasing both its ACME1 and ACME2 products at the leading global event for the electrical engineering community, CWIEME Berlin, being held 3-5 June 2025 at Messe Berlin."*
- Don't forget how! This should be in your first paragraph.
- Your second and third paragraphs should contain technical details about your product or service
- Include a quote in your fourth or fifth paragraph. Remember:
  - Make sure it sounds like a human said it
  - Don't include jargon
  - Ensure the quote develops the story and doesn't just comment on it
- The last paragraph is the home of your call-to-action

## GOOD CALL-TO-ACTIONS

'ACME LTD will have its new spinning red widget available for customers to preview on stand number 555 at CWIEME Berlin.'

'Every visitor that uses the smart badge will be entered into a competition to win a hamper of eco-goodies after the show.'

## BAD CALL-TO-ACTIONS

'Visit our website to learn more.'

'Find out more'

'Click here'

'See further information'

# Speaking to Journalists

**As exhibitors, engaging effectively with the media is a pivotal component of maximising your presence at CWIEME Berlin.**

This section is designed to equip you with essential insights and strategies for communicating with journalists, enabling you to effectively convey your company's message, innovations and expertise. Whether you're a seasoned professional or new to media interactions, the tips and guidelines presented here will help you navigate media engagements confidently.

## Why should you speak to a journalist?

- 1 Get your name out there
- 2 Put yourself in control of how your business is perceived
- 3 The chance to showcase new products and innovations
- 4 Build relationships that could help you project your business and gain exposure

### The 3 points of refuge

Think of three key messages that you want to communicate when speaking to a journalist

1

These should be used in response to each question, using bridging tactics and a variety of expression

2

Prepare analogies, examples and key facts in advance

3

Anticipate the questions

But remember, there will always be specific questions that need specific answers as well

## Before the day, make sure you have:

- Prepared your points of refuge
- Decided what you would like to get out of a journalist meeting
- Briefed your team on what to do if a journalist visits your stand
- Packed any useful material that's worth passing on, like business cards, a press release or handy quotes

## Handling difficult questions

What's easy to forget is that journalists are not trying to catch you out – they are trying to glean as much information as possible to be able to write the best article. However, if you are asked a difficult question:

- Chip away at the question with a question
- Be honest, but helpful. You're not the expert, but your colleague on the stand is.
- Remember your three points of refuge
- Control the question. Apply your bridging tactics to guide the conversation.

## Bridging techniques

- "You know, the question I get asked the most is..."
- "What many people don't know is..."
- "The most important part of that question is..."
- "The bottom lines is..."
- "The real issue here is..."

## So, to conclude - follow A, B, C, D:

**A**cknowledge the question

**B**ridge into a positive message

**C**oncentrate on the points of refuge

**D**angle the next point

## The post-show debrief

After the show, make sure you:

- ☒ Follow up with people you've spoken to and ask how they found the show
- ☒ Send over any facts, sources and supporting documents
- ☒ A 'what we learned' at the show always goes down well. Write up an article on the key trends and topics you noticed were present
- ☒ Put them in touch with any other experts you may have recommended
- ☒ Arrange any further interviews, confirm quotes and answer any questions
- ☒ Add them on LinkedIn
